

• **RENDEZ Plank**

Safety is always the paramount important in construction business, that is the reason why the scaffolding regulation are intensified and getting stringent. One of the increasing issues in scaffolding business is the use of wood/timber for scaffolding board, besides of its scarcity due to the green environment issues also there are some weakness such as weight, unreliable etc, to overcome such issues, RENDEZ scaffolding would like to introduce planks which will benefit to all scaffolding users.

**Standard : SS280**

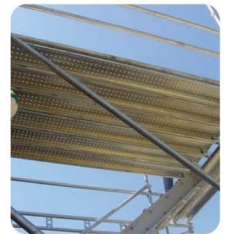

- Model :**  
**RSP-12-1 :**  
 Size 250 mm x 40 mm x 1.2 mm x 1 m  
**RSP-12-2 :**  
 Size 250 mm x 40 mm x 1.2 mm x 2 m  
**RSP-12-3 :**  
 Size 250 mm x 40 mm x 1.2 mm x 3 m  
**RSP-12-4 :**  
 Size 250 mm x 40 mm x 1.2 mm x 4 m

**Standard : AS1577**

- Model :**  
**RSP-18-1 :**  
 Size 250 mm x 50 mm x 1.8 mm x 1 m  
**RSP-18-2 :**  
 Size 250 mm x 50 mm x 1.8 mm x 2 m  
**RSP-18-3 :**  
 Size 250 mm x 50 mm x 1.8 mm x 3 m  
**RSP-18-4 :**  
 Size 250 mm x 50 mm x 1.8 mm x 4 m

• **RENDEZ Board Retaining Coupler**

**Model :**  
**RBRC-G-486**  
 ( For SS280 Standard )

**Model :**  
**RBRC-AS-486**  
 ( For AS1577 Standard )

**Features :**

- High safety standard  
It hold stronger than wire rope / wire steel, to hold between the RENDEZ plank and the bearer.
- More economical because its re-usable.  
Unlike wire rope / wire steel which tend being cut when dismantling, board retaining coupler is re-usable.
- Easier and faster installation.  
It increases productivity.
- Don't need extra tools.  
Don't need combination plier ( to cut wire when need installation or dismantling ).
